Our experienced summer staff comes from a wide variety of backgrounds including recreation, education, social work child development, or a related field. The staff consists of college graduates and college and high school students from Weston and surrounding towns. Arts and crafts, cooperative leadership activities, drama, music, swimming, sports, and much more will be part of each camper’s summer fun!

CampDocs

Health forms for your child are now even easier to complete! In our continuous efforts to provide the best possible care for our campers, Weston Recreation is once again partnering with CampDoc.com. CampDoc.com is an electronic health record system for camps and will help us consolidate and integrate camper health information into a centralized and secure location. Their system will give Weston Recreation staff instant access to camper health information, a key component to providing quality care. All required health forms will be completed through CampDoc.com, within 5-7 days of registering your child(ren), you will receive an email from CampDoc.com providing you with your account log in information. The sky is the limit in Expert Architects! In this math, writing, and presentation class, students each serve as president of a new architectural firm and are tasked with designing and building the city’s next skyscraper. Students study a kid-friendly history of skyscrapers and create a blueprint of their own stylized tall building. They then must weigh other considerations including the environment, traffic, and surrounding buildings using Google Earth to find the perfect location for their project. Our expert architects create a three-dimensional model of the structure and present their work to invited parents. See a full curriculum preview: rightbraincurriculum.com/expertarchitects.

Your Voice, Public Speaking

#40223

Instructor: Right Brain Curriculum

Famously, Americans number one fear is public speaking, while death only ranks number two. If that’s so this profound fear probably starts at an early age. In our Public Speaking class, we take the fear out of speaking before an audience by getting kids talking in front of a supportive group about things in which they are interested. They write speeches on subjects of their choice and practice delivering them to the assembled students. As the kids practice in this low-pressure environment, they learn skills like standing up tall, using a loud voice and making eye contact. We also watch famous and not-so-famous public speakers and critique what a successful and unsuccessful in their deliveries. The class concludes with students creating a TV news broadcast in which they serve as anchors. See a full curriculum preview: rightbraincurriculum.com/publicspeaking.
